ZamTech at a glance

ABOUT US

We create technological solutions to **increase productivity** and **reduce costs** through **automation**, administrative **applications**, **data management** and process **consulting**.

We achieve it by applying our expertise in Information Technology (IT) in the areas of Software Development, Databases (DB), Data Science (DS) and Business Intelligence (BI).

Finance	IT	Sales	Marketing	Purchases	Imports Exports	Logistics

DATA BASES & ANALYSIS

Solutions for your company to obtain the greatest benefit from its databases, through extraction, transformation, and loading processes and Business Intelligence tools.

Powerful visuals and dashboards in **Power BI, Tableau, and Excel**.

Optimization of **Artificial Intelligence** algorithms with **Python: Pandas, Numpy, TensorFlow, Keras.**

PROCESS AUTOMATION

Software for repetitive tasks that **saves man hours and eliminates human errors**, making your organization more efficient.

CUSTOM SOLUTIONS

Applications that solve any administrative related issue in your company.

Creation, maintenance and update of applications.

Python, C#, Cloud, APIs, Java, Lotus Notes, .NET, VBA and more.
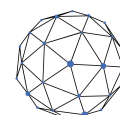

CONSULTING AND PM

Reengineering and optimization of administrative processes.

Project management (PM) using **SCRUM** methodology and with certified professionals in **PMP**.
